

Simplex ST-ST Fiber Adapter Datasheet

Precisely connect two connectors to transmit the most signal sources

• Description

The OPTICO ST-ST simplex fiber adapter accurately connects two connectors to transmit the most signal sources and minimize the loss. It is mainly used for the connection of cables to cables or optical cables to equipment.

OPTICO provide a wide range of high matching and conversion adapters, including special male-to-female conversion fiber optic adapters.

• Features

- Good repeatability
- High temperature resistance
- Good interchangeability
- Acid and alkali resistance
- Low insertion loss
- Stable performance
- Connector Type could be customized

• Specifications

Parameter	ST Adapter			
	SM			MM
	PC	UPC	APC	PC
Insertion loss	<0.2dB	<0.2dB	<0.2dB	<0.2dB
Repeatability	The change of 1000 interpolation times is less than 0.2dB			
Durability	<0.2dB			
Temperature	-40~+85°C
